

RCMP Roof Top Unit Upgrade

March 2017

Project Summary

The 15 year old roof top unit at the RCMP building that serves 4 offices was upgraded in December 2016. Estimated savings from this project are approximately **967 kWh/year in electricity and 68 GJ/year in natural gas** or approximately **\$650/year in energy costs**. Within the last 7 years, 6 of the 9 rooftop units at the RCMP building have been upgraded!

Benefits associated with this project include:

- Improved control of the heating and cooling system resulting in increased patron comfort
- Increased life span, resulting in decreased maintenance costs

This project cost approximately **\$10,000**.
