

This timeline shows the City's avoided energy use from energy reduction projects. To date, the City has avoided approximately 3,375,917 ekWh of energy. This is equal to approximately \$230,000 in energy costs!

Why is this important?

Reduced energy use not only saves money, but also benefits members of the community. Benefits include:

- Increased patron comfort and safety at facilities
 - Decreased maintenance costs
 - Reduced greenhouse gas emissions
