

Locations

The City of Cranbrook and Cranbrook in Bloom Committee have developed site plans for each of the following locations to ensure that your 'Tree for Life' is placed in the best possible position and is shown to its best advantage.

These "Trees for Life" locations will provide many years of enjoyment for the donor and public alike. In future years these locations will become 'demonstration urban forests'.

The following sites have been chosen for their readily available source of water, accessibility and visibility for all to enjoy.

- Moir Park
- Gyro Park
- MacKinnon Park
- Kinsmen Greenbelt
- Lions Park
- Pop Price Park

All locations and tree types will be reviewed by Parks staff to ensure suitability for best results.

The Partnership

Our commitment to you is to provide ongoing care and maintenance for your tree by the City of Cranbrook. Trees that need to be replaced after the warranty period, between the first and fifth years will be provided for by a City of Cranbrook reserve fund. In the unlikely event that a tree will have to be replaced after the 5th year donors will be asked if they wish to replace the tree.

I am interested in purchasing a tree:

Name

Address

Phone

Email

Tree (specify type from recommended list):

Location (specify from choices listed):

Inscription (specify wording—we can help)

Drop off this completed request form to the Administration Office at
Western Financial Place
1777 2nd Street North

For more information call:
Carrie 489-0267

Cost:

Trees (including a bracelet plaque) are **\$535**, including delivery, planting and ongoing care. Minimum size: 2" trunk, 3' from ground level.
(7 + years old)

"Trees for Life"

A City of Cranbrook program to plant commemorative trees as a living gift.

Rotary Park Avenue of Trees

Sustain those memories of a special person, whose life you wish to commemorate, or perhaps celebrate a meaningful event such as a birth, wedding, anniversary, retirement, graduation or special achievement. Plant a tree of your choice and identify your gift with a celebratory plaque.

Bur Oak

Recommended Trees

The following is a list of trees that have been chosen not only for their longevity and hardiness but also because they are beautiful as mature trees.

Small - Medium Trees (20 - 30')

Flowering Crab - very hardy, beautiful spring display. (Gyro Park Location only)

Schubert Chokecherry - hardy, showy spring display, deep red summer foliage.

Hawthorn - 'Toba' and 'Snowbird', hardy, pinkish white flowers in spring, followed by red fruit.

Mountain Ash - 'Showy' and 'European' white flower clusters and red fruit.

Flowering Crabapple

Medium - Large Trees (40 - 80 ')

Ash - "Northern Treasure" & 'Bergeson', hardy, drought tolerant, rounded form

Linden - 'Greenspire' and 'Dropmore' - hardy, tidy, straight form, sweet summer fragrance

Maple - 'Autumn Blaze' and 'Emerald Queen' - for shade and beautiful fall colour

Oak - 'Bur' and 'Mongolian' - one of the longest lived trees, and offers distinctive acorns and striking fall colour.

Many other trees may be used upon approval from Parks Staff.

Linden Trees for summer fragrance and good shade
