

Aquatic Center Underwater Lighting Upgrade

June 2018

Project Summary

During this year's annual pool maintenance shutdown, the City replaced all the old Incandescent and Quartz Underwater Lighting. The new LED Underwater Lighting has an increased lifetime of **118,000 Hours** and improved the quality of lighting. The project will have an annual energy savings of **58,886 (kWh)** of electricity and estimated cost savings of approximately **\$3,300/year**.

Benefits associated with this project include:

- Improved Underwater Light Quality
- Increased Energy Efficiency
- Increased Life Span of Lights
- Decrease in Maintenance
