

Library Heating Controls

March 2017

Project Summary

The end-of-life controls for the Library's heating system were upgraded in December 2016. The thermostat settings were also refined, resulting in a decrease of heating hours. Estimated cost savings from this project is estimated at approximately **\$5,500/year!**

Benefits associated with this project include:

- Improved control of the heating system resulting in increased patron comfort
- Increased energy efficiency
- Increased life span of heating system, resulting in decreased maintenance costs

This project cost approximately **\$40,000**. The simple payback for this project is 7 years.
